Rallito-X

August 28, 2012

For the most observers the first view on [Rallitox](#) Street Art works seem to be offending provoking but somehow, not directly vulgar. But after following the works of Rallitox for a while, the observer can realize that Rallitox has more to express than some kind of monsters with too much eyes, dicks or tits. You could come to a point, where you could understand how real, true and honest his works are reflecting the society. A lot of people seem to not understand that mirror, he is holding up against our face by leaving his Street Art pasted or painted against a wall. Or they just haven't realized the problems that the society is facing. Rallitox works are showing, how the society is driving into the wrong turn while chasing behind their dreams, of being rich, and being greedy, a super mode, and sick, and so on. No wonder that the content is often about politics and the media. The truth can hurt, and this is why Rallitox probably had to choose his way of being a noncommercial Street Artist, because most galleries like to keep their clients happy, even when they are blind. Long story short telling: He is portraying humans.
